Valcom PagePro IP™

The Valcom PagePro IP can register with Avaya Aura Communication Manager and Aura Session Manager as eight separate SIP endpoints (access numbers), providing up to eight zones of SIP-based paging. When a call is placed to one of the access numbers, the device answers the call and automatically establishes a one-way communication path with a preconfigured group of IP speakers and/or analog speakers/gateways associated with the access number.

MULTICAST ENABLED IP NETWORK

Valcom One-Way IP Speakers

The Valcom One-Way IP Speakers can be configured as SIP endpoints that register with Avaya Aura Communication Manager and Aura Session Manager. When a call is placed to the Valcom One-Way IP Speaker, the device automatically answers the call and provides one-way communication.

Valcom Talkback IP Speakers

The Valcom Talkback IP Speakers can be configured as SIP endpoints that register with Avaya Aura Communication Manager and Aura Session Manager. When the call button is pressed on each of the Valcom Talkback IP Speakers, the Speaker initiates a call to a preconfigured destination that resides on Aura Communication Manager and Aura Session Manager, and provides hands-free two-way communication.
