

Transportation  
Solutions

IT  
MATTERS  
WHAT  
SYSTEM  
YOU  
CHOOSE

**People are on the move.  
Valcom Public  
Address/Voice Alarm  
(PAVA) systems  
keep them safe and informed.**

Travelers rely on transit hubs to provide them with accurate information to assist them while traveling and count on being safe while there. Valcom understands that an adequate communication system is vital to informing and communicating audible alerts such as gate changes, passenger pages, and instruction in emergency situations.

Find out how Valcom's solutions enable you to keep individuals in the know and protected while within your walls.

Visit [www.valcom.com](http://www.valcom.com) for more information.

**Messages to reunite people with lost items and separated traveling companions, common in a sea of passengers, relieve stressful situations.**

With Valcom PAVA systems, locating staff or passengers is as easy as picking up a telephone.

**VALCOM**

مرحبًا

BONJOUR

HELLO

Pre-recorded announcements in multiple languages ensure that all nationalities of passengers receive the information they need.

**Novice or experienced travelers alike may panic in busy, unfamiliar transportation hubs.**

Highly visible Valcom HelpPoints™ to summon emergency personnel can save lives or may be used for weary travelers to get the answers they seek.

with the press of a button

**VALCOM**

Now Departing  
Flight 7870

Information about food and other retail services helps to ease travelers' journeys.

Perfectly timed, automated messages help new arrivals to rapidly locate what they need during quick connections.

**In unforeseen crisis situations, a fully deployed PAVA system, reinforced with LED signs and attention-grabbing flashers, is critical to direct those in harm's way. . . to safety.**

Nothing is more important than people's lives. Having the right PAVA system in place is a critical part of keeping people safe.

# EVACUATE

**Crisis situations make it difficult to make the right decisions.**

Pre-arranged response to potential crises with user friendly, yet secure, triggers can eliminate confusing mixed messages.

Dialing a code on a phone or turning a switch to launch a pre-arranged audible/visual “evacuation” or “take shelter” plan may mean the difference between order and chaos, or worse.

**It's easy to miss important announcements in fast-moving, noisy environments.**

Targeted message delivery can minimize noise pollution – areas only receive relevant content, not every message.

People tend to pay attention when every message is relevant.

“ Sometimes our facility is very noisy, and sometimes it is very quiet... how can Valcom help? ”

Automatic volume controls effortlessly adjust speaker volumes as necessary.

Prerecorded/scheduled message volumes can change based upon time and day.

**Moving between time zones can be confusing.**

**People need to know the current local time to ensure seamless travel transitions.**

Valcom's expertise in providing coordinated time serves millions of people every day!

Hourly automated time announcements, time displayed on LED signs and synchronized clocks throughout a facility keep everyone in synch and everything on schedule.

**Clear communication is a key measure of a traveler's experience. Valcom can elevate that experience.**

Valcom has over 45 years of experience exceeding the requirements and expectations of transportation hubs, hospitals, schools, and a multitude of other facilities.

Valcom's suite of Software Solutions simplifies your enterprise operations from day-to-day communications, maintenance management and emergency situations.

Our software solutions allow you to have control over your notification platform, keeping people safe, informed and on schedule.

The Valcom logo consists of the word "VALCOM" in a bold, white, sans-serif font, set against a dark background. The letters are closely spaced and have a slight shadow effect.

## V-Alert® Mobile App

V-Alert Mobile is a reliable safety tool easily accessed via your mobile device. It enables you to communicate with individuals out of the range of traditional notification methods such as speakers, horns, call boxes and LED signs.

With V-Alert Mobile, you can reach people whether they are indoors, outdoors, or on the go.

By setting virtual perimeters, you can alert people within a specific area regarding any possible danger or crucial information they need.
