

Technical Specifications

V-9320 Call Switch With Privacy Switch

- Adjustable volume control
- Convenient privacy switch
- No external power required
- Brushed stainless steel

*Built-in volume control
Privacy switch*

Description:

The V-9320 Call Switch provides a three-position rocker switch and volume control. When the switch is activated in the momentary "CALL" position, an intercom call is initiated to the Administrative phone. When the switch is moved to the "PRIVACY" position, paging communication from the Administrative phone to the speaker is possible, but communication from the speaker to the Administrative phone is blocked until another call is initiated from the same device. This prevents the Administrative phone from monitoring the sound at the speaker.

SPECIFICATIONS

CALL SWITCH

Black single pole momentary pushbutton "Normal Call"

CONTROLS

Privacy switch
Built-in volume control

MOUNTING
