Page Controls

The V-2003A page control unit provides telephone systems access to 3 zones of one-way paging. It has built-in tone generator that can produce warble and alert tones. The unit allows you to conduct emergency page override for priority messages.

The V-2003AHF version enables you to access 3 zones for one-way paging or handsfree talkback.

Built-in tones: steady tone, warble tone, alert tones

Three Zone Page Control Unit
