

Exceed the Limits of Traditional Message-On-Hold Systems with Valcom's Messenger USB!

Traditional message-on-hold systems utilize cassette tapes that typically place limits on the length of music and messages available. Valcom's Messenger USB, a state-of-the-art digital audio playback device, eliminates time limitations and provides an infinite opportunity for continuous background music or music/message on hold playback. This new digital message-on-hold system supports MP3 file playback without any special drivers or software.

- Continuous Playback of Music and/or Messages
- Supports Flash Drives Up to 4GB
- High Quality Audio Playback Up to 128Kbps
