Panasonic Announces Completion of Interoperability Testing with Valcom Unified Communications Solutions

NEWARK, N.J. – April 12, 2018 – Panasonic System Solutions Company of North America, Division of Panasonic Corporation of North America, today announced the completion of interoperability testing between its KX-NS Series IP-based business communications server designed to support small businesses and growing enterprises in need of flexible solutions, and Valcom’s IP and SIP based products. With interoperability between these systems, customers using these solutions from Valcom and Panasonic are able to increase employee productivity, decrease costs associated with legacy non-integrated systems and increase access to information.

“We are very excited to announce Panasonic’s KX-NSX2000 interoperability with Valcom’s IP and SIP based solutions,” said Gary Moeller, product manager of unified communications at Panasonic System Solutions Company of North America. “Today, businesses expect communication, information availability and business decisions to happen instantaneously, and we’re excited to partner with organizations that will help us offer efficient solutions that enable businesses to meet these needs and help them remain competitive in today’s global business landscape.”

“Valcom’s IP and SIP Mass Notification solutions offer a great option for the Panasonic KX-NS Series systems,” said John Mason, President of Valcom. “We are enthusiastic about the opportunity to provide Panasonic customers with proven-compatible products for alerting and notification. Whether retrofitting to existing systems, or creating a new system, Valcom can help integrate voice notification to your Panasonic IP infrastructure.”
