

VIP-812B DUAL NETWORK STATION PORT

INTRODUCTION

The VIP-812B Dual Network Station Port allows most loop start terminal devices to be connected to a managed IP-based network.

SPECIFICATIONS

Access Methods

- PBX, FXO Port
- POTS telephone set

Features

- RJ-45 for network connection
- 2 RJ-11 telephone connections
- 4 Relays with Form C contacts
- Front panel activity LED
- Network activity LEDs
- Ringer equivalency (REN)=0.8A
- 2.5mm jack for external power (optional)
- Power over Ethernet (PoE) 802.3af compatible

Dimensions/Weight

- 1.72 H x 7.00" W x 11.88" D
(4.36cm H x 17.78cm W x 30.18cm D)
- Weight: 2.5 lbs. (1.13 kg)

Nominal Specifications

| | |
|-------------------|-----------------|
| Input Impedance: | 600 Ohms |
| Input Level: | -10dBm |
| Output Impedance: | 600 Ohms |
| Output Level: | - 10dBm nominal |
| Relay Current: | 1 AMP @ 24VDC |
| Ring Voltage | 42vRMS@20Hz |

Nominal Power Requirements

Via rear panel barrel connector:

| | |
|----------|-------|
| Voltage: | 24VDC |
| Current: | 325mA |

Via 802.3af (PoE) Ethernet Switch:

| | |
|----------|---------|
| 802.3af: | Class 3 |
|----------|---------|

These products are intended for use with a UL Listed power source marked "Class 2" or "LPS" rated 24VDC, or 48VDC (PoE).

PoE and all interconnected ITE are intended for intra-building.

Environment

| | |
|--------------|----------------------------|
| Temperature: | 0 to +40° C |
| Humidity: | 0 to 85% non-precipitating |

Precautionary Designations

- **WARNING-To Reduce The Risk Of Fire Or Electric Shock. Do Not Expose This Apparatus To Rain Or Moisture.**
- **AVERTISSEMENT - Afin de réduire les risques d'incendie ou de décharge électrique, évitez d'exposer le système à la pluie ou à l'humidité.**
- **Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.**
- **L'appareil ne doit pas être exposé à des égouttements et éclaboussures et aucun objet rempli de liquide, comme vase, ne doit être placé sur l'appareil.**

NOTE: The telephone system referred to in this manual is the customer premise equipment such as an electronic key system, a PBX or a dedicated single line telephone sets. The VIP-812B is not intended for direct or indirect connection to the public telephone network. When used with a customer premise

telephone system such as a key system or PBX system, these units are interfaced to the system via a fully protected system central office port, which is a fully protected interface device. Also, the host system must be configured to disallow central office trunk conferencing in order to prevent indirect connection to the public network.

IMPORTANT SAFETY INFORMATION

CONSIGNES DE SÉCURITÉ IMPORTANTES

1. Read these instructions.
Lisez ces instructions.
2. Keep these instructions.
Conservez ces instructions.
3. Heed all warnings.
Respectez tous les avertissements.
4. Follow all instructions.
Suivez toutes les instructions.
5. Do not use this apparatus near water.
Ne pas utiliser cet appareil près de l'eau.
6. Clean only with dry cloth.
Nettoyer avec un chiffon sec.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
Ne pas bloquer les ouvertures de ventilation. Installer conformément aux instructions du fabricant.
8. Do not install near any heat sources such as radiators, heat registers, stoves or other apparatus (including amplifiers) that produce heat.
Ne pas installer à proximité de sources de chaleur telles que radiateurs, registres de chaleur, poêles ou autres appareils (y compris les amplificateurs) produisant de la chaleur.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade and the third prong are provided for your safety. If the provided plug does not fit into your outlet consult an electrician for replacement of the obsolete outlet.
Ne pas contourner le dispositif de sécurité de la fiche polarisée ou de mise à la terre. Une fiche polarisée possède deux lames dont une plus large que l'autre. Une fiche de terre a deux lames et une troisième broche de mise à la terre. La lame large et la troisième broche sont fournies pour votre sécurité. Si la fiche fournie ne rentre pas dans votre prise, veuillez consulter un électricien pour le remplacement de la prise obsolète.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
N'utilisez que des fixations / accessoires spécifiés par le fabricant.
12. Use only with the cart, stand, tripod, bracket or table specified by the manufacturer or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

Utilisez uniquement avec le chariot, stand, trépied, support ou table spécifié par le fabricant ou vendu avec l'appareil. Quand un chariot est utilisé, Soyez prudent lorsque vous déplacez l'ensemble chariot / appareil pour éviter des blessures dues au renversement.
13. Unplug this apparatus during lightning storms or when unused for a long period of time.
Débranchez cet appareil pendant les orages ou lorsqu'il n'est pas utilisé pendant une longue période de temps.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way. Such as when the power supply cord or plug is damaged, liquid has been spilled, objects have fallen into the apparatus or the apparatus has been exposed to rain or moisture and does not operate normally or has been dropped.
Confiez toute réparation à un personnel qualifié. Une réparation est nécessaire lorsque l'appareil a été endommagé de quelque façon. Par exemple lorsque le cordon d'alimentation ou la fiche est endommagé, du liquide a été renversé, si des objets sont tombés dans l'appareil ou le appareil a été exposé à la pluie ou à l'humidité et ne fonctionne pas normalement ou s'il est tombé.

| | | |
|---|---|---|
|  | CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN |  |
| CAUTION: To reduce the risk of electric shock, Do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel. | | |
|  | | |
| This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this unit. | | |
|  | | |
| This symbol indicates that there are important operating and maintenance instructions in the literature accompanying this unit. | | |

General Mounting Information

- A) Elevated Operating Ambient - If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (Tma) specified by the manufacturer.
- B) Reduced Air Flow - Installation of the equipment in a rack should be such that the amount of air flow required for safe operation of the equipment is not compromised.
- C) Mechanical Loading - Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading.
- D) Circuit Overloading - Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.
- E) Reliable Earthing - Reliable earthing of rack-mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g. use of power strips).
- F) Equipment only suitable for mounting at heights less than or equal to 2m" (6.56') or similar verbiage.

FCC Information

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area may cause harmful interference in which case the user will be required to correct the interference at his own expense.

INSTALLATION

Mounting

Wall: Using #8 screws (included), attach the wall mounting brackets to each side of the VIP-812B as shown in Figure 2. Use the included wood screws to attach the VIP-812B to the wall. For surfaces other than wood, use hardware appropriate for the surface (not provided).

Rack: Two VIP-812B units may be joined together and installed into a 1U rack slot. Using Figure 3 as a guide, attach the interlock brackets and end mounting brackets to each of the VIP-812B units, then mount the combined units into an available rack slot.

Table: Provided with the VIP-812B are four rubber pads. Peel pads from their carrier backing and place at the four corners of the bottom of the unit.

Power Connections

The preferred method of powering a VIP-812B is via a Power over Ethernet (PoE) switch meeting the 802.3af specification.

Make all required signal connections before applying power to the unit. If powering via 802.3af, make sure all signal connections via the back panel are made then connect the VIP-812B to the Ethernet switch.

If the rear panel barrel connector is used for power, the preferred power supply is a Valcom VIP-324D. Make sure all signal connections are secure. Attach the unit to the network via the front panel RJ-45 Ethernet connector. Apply power by plugging the power supply in to the VIP-812B via the barrel connector on the rear of the VIP-812B.

Network Connection

The VIP-812B has one RJ-45 network connector on the front panel.

Use a standard Ethernet patch cable to connect the VIP-812B to an Ethernet switch. If the Ethernet switch is 802.3af compliant, the VIP-812B will draw power from it.

Signal Connections

On the back panel, the VIP-812B has 2 RJ-11 jacks for telephone connection and 2 terminal blocks for relay connections. (See Figure 1)

FXO Connections: Connect loop start FXO port or standard analog telephones to the VIP-812B via the rear panel RJ-11 jacks labeled Phone 1, Phone 2. Tip and Ring appear on pins 3 and 4 of these jacks.

Relay Connections: Access to the 4 form C relays is provided via two six pin screw terminal blocks. The relays are labeled K1, K2, K3 and K4. Each relay is brought out on three terminals. The common contact (COM) is the middle terminal with the normally closed (N.C.) contact on the right and the normally open (N.O.) contact

on the left. Relay contacts are rated for 1A @ 4VDC.

Figure 1. Rear View

Status Indicator Lights

The VIP-812B has 3 status indication lights on the front panel:

STATUS: Illuminates at regular intervals during normal operation. On steady indicates unit is in reset mode.

The network jack provides two LED indicators:

Green LED: (Link) Indicates Ethernet connection when illuminated.

Yellow LED: (Activity) Indicator flashes to indicate network activity.

Setup

Information specific to your application will need to be programmed into the VIP-812B using a computer. The PC used for programming should be connected to the same subnet as the VIP-812B.

Setup will be done using the IP Solutions Setup Tool. Download the latest version of the free IP Solutions Setup Tool from Valcom web site at www.valcom.com/vipsetuptool.

TECHNICAL ASSISTANCE

When trouble is reported, verify power is being supplied to the unit and there are no broken connections. If a spare unit is available, substitute a spare unit for the suspected defective unit.

Assistance in troubleshooting is available from the factory. Call (540) 563-2000 and press 1 for Technical Support or via email at support@valcom.com.

When requesting assistance, you should include all available information. General information and troubleshooting procedures are available on the Valcom website at www.valcom.com.

Valcom equipment is not field repairable. Valcom, Inc. maintains service facilities in Roanoke, VA. Should repairs be necessary, attach a tag to the unit clearly stating your company name, address, phone number, contact person and the nature of the problem. Send the unit to:

Valcom, Inc.
Repair & Return Dept.
5614 Hollins Road
Roanoke, Va. 24019-5056

WARRANTY

Warranty information may be found on our website at www.valcom.com/warranty.
