## V-2972 <br> CALL SWITCH

## INTRODUCTION

The V-2972 Call Switch was designed to be used with Talkback Page Control Units with the remote calling feature. The V-2972 provides a momentary spring return rocker switch for connection to customer provided signaling equipment.

## DIMENSIONS/WEIGHT

- 4.50 " H x 2.75 " W x 1.50 " D
(11.43cm H x 6.99cm W x $3.81 \mathrm{~cm} \mathrm{D)}$
- 0.2 lbs . .09 kg )

## FEATURES

- Designed to fit in a standard single-gang electrical box.
- No external power source required.
- White "Call" button for normal call.
- Satin finished one-gang stainless steel plate.

## CONNECTIONSISETUP

1. Connect switch inputs from control unit to V-2972 as shown in connection diagram.
2. Connections are made by factory supplied 3 inch insulated pigtails that connect to push-on style terminals.
3. Place V-2972 over standard single-gang electrical box with minimum depth of 2 inches and fasten in place using the two \#6-32 screws provided.

## TECHNICAL ASSISTANCE

When trouble is reported, verify that there are no shorts or grounds on cabling.

Assistance in troubleshooting is available from the factory. When calling, you should have a VOM, a telephone test set available and call from the job site. Call (540) 563-2000 and press 1 for Technical Support or visit our website at http://www.valcom.com.

Valcom equipment is not field repairable. Valcom, Inc. maintains service facilities in Roanoke, VA. Should repairs be necessary, attach a tag to the unit clearly stating company name, address, phone number, contact person and the nature of the problem. Send the unit to:

Valcom, Inc.
Repair and Return Dept. 5614 Hollins Road Roanoke, VA 24019-5056
