

VIP-4122-A12 IP LAY-IN SPEAKER / ANALOG CLOCK COMBO

INTRODUCTION

The Valcom VIP-4122-A12 IP Clock with Speaker includes a 12" Analog Clock and a 2' x 2' Lay-in Ceiling Speaker. This provides synchronized time, talkback intercom and loudspeaker paging from one IP network connection. The 12" Analog Clock will sync its time with any NTP (Network Time Protocol) server. The enclosure is made of steel with a durable powder coated finish. Power is provided to both the clock and speaker via a Power over Ethernet (PoE) switch meeting the 802.3af specification.

SPECIFICATIONS

Features

- Only one network connection required
- Clock has a low-profile/semi-flush smooth surface metal case and shatterproof polycarbonate crystal
- Power over Ethernet (PoE) 802.3af compatible
- High Efficiency Speaker

DIMENSIONS/WEIGHT

- Clock – 12.81" diameter x 1.20" depth
Weight: 3.7 lbs. (1.7 kg)
- Speaker – 23.75" L x 23.75" W x 3.75" D
(60.33 cm) x (60.33 cm) x (9.53 cm)
Weight: 5.5 lbs. (2.5 kg)

Nominal Power Requirements

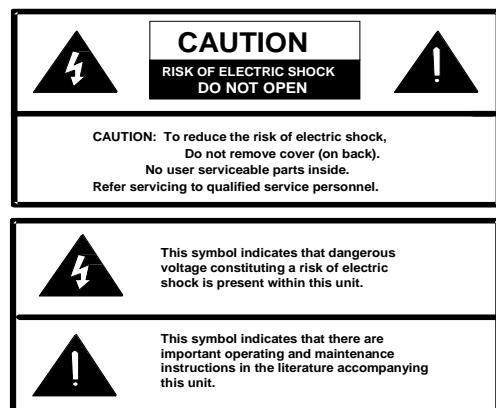

Via 802.3af PoE Ethernet Switch: Class 3
PSE (Power Sourcing Equipment) to be compliant to IEEE 802.3af

Environment

Temperature: 0 to +40° C
Humidity: 0 to 85% non-precipitating

Precautionary Designations

- **WARNING: To Reduce The Risk Of Fire Or Electric Shock. Do Not Expose This Apparatus To Rain Or Moisture.**
- **AVERTISSEMENT: Afin de réduire les risques d'incendie ou de décharge électrique, évitez d'exposer le système à la pluie ou à l'humidité.**
- **Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.**
- **L'appareil ne doit pas être exposé à des égouttements et éclaboussures et aucun Objet Rempli de liquide, comme vase, ne doit être placé sur l'appareil.**

IMPORTANT SAFETY INFORMATION

CONSIGNES DE SÉCURITÉ IMPORTANTES

1. Read these instructions.
Lisez ces instructions.
2. Keep these instructions.
Conservez ces instructions.
3. Heed all warnings.
Respectez tous les avertissements.
4. Follow all instructions.
Suivez toutes les instructions.
5. Do not use this apparatus near water.
Ne pas utiliser cet appareil près de l'eau.
6. Clean only with dry cloth.
Nettoyer avec un chiffon sec.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
Ne pas bloquer les ouvertures de ventilation. Installer formément aux instructions du fabricant.
8. Do not install near any heat sources such as radiators, heat registers, stoves or other apparatus (including amplifiers) that produce heat.
Ne pas installer à proximité de sources de chaleur telles que radiateurs, registres de chaleur, poêles ou autres appareils (y compris les amplificateurs) produisant de la chaleur.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade and the third prong are provided for your safety. If the provided plug does not fit into your outlet consult an electrician for replacement of the obsolete outlet.
Ne pas contourner le dispositif de sécurité de la fiche polarisée ou de mise à la terre.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
N'utilisez que des fixations / accessoires spécifiés par le fabricant.
12. Use only with the cart, stand, tripod, bracket or table specified by the manufacturer or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
Utilisez uniquement avec le chariot, stand, trépied, support ou table spécifié par le fabricant ou vendu avec l'appareil. Quand un chariot est utilisé, Soyez prudent lorsque vous déplacez l'ensemble chariot / appareil pour éviter des blessures dues au renversement.
13. Unplug this apparatus during lightning storms or when unused for a long period of time. Débranchez cet appareil pendant les orages ou lorsqu'il n'est pas utilisé pendant une longue période de temps.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way. Such as when the power supply cord or plug is damaged, liquid has been spilled, objects have fallen into the apparatus or the apparatus has been exposed to rain or moisture and does not operate normally or has been dropped.
Confiez toute réparation à un personnel qualifié. Une réparation est nécessaire lorsque l'appareil a été endommagé de quelque façon. Par exemple lorsque le cordon d'alimentation ou la fiche est endommagé, du liquide a été renversé, si des objets sont tombés dans l'appareil ou le appareil a été exposé à la pluie ou à l'humidité et ne fonctionne pas normalement ou s'il est tombé.

FCC Information

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area may cause harmful interference in which case the user will be required to correct the interference at one's own expense.

INSTALLATION

Speaker Mounting

The 2'x2' Lay-in Speaker is designed to replace ½ of a standard 2'x4' ceiling tile.

Speaker Connections

Connect the attached wire assembly from the Lay-in Speaker to the Speaker screw connections on the clock circuit board after mounting the clock. (Figures 3 & 4)

Clock Mounting

(A) Attach the supplied mounting bracket to a wall or a standard single-gang electrical box using appropriate hardware such as #8 pan head screws (not supplied). Mount in same orientation as shown. (Figure 1)

(B) Connect the wire assembly from the Lay-in Speaker to the Speaker screw connections on the clock circuit board. (Figure 4).

(C) Attach the 5-pin female molex connector to the male socket on the back of the clock. (Figure 2)

(D) Connect a standard Ethernet patch cable from an Ethernet switch into the RJ45 connector on the clock. If PoE is not available, a PoE mid-span injector may be used to power the clocks.

(E) Place the enclosure of the clock on the outside of the upper and lower posts on the mounting bracket. Insert screws (supplied) to hold clock securely to bracket (Figure 1).

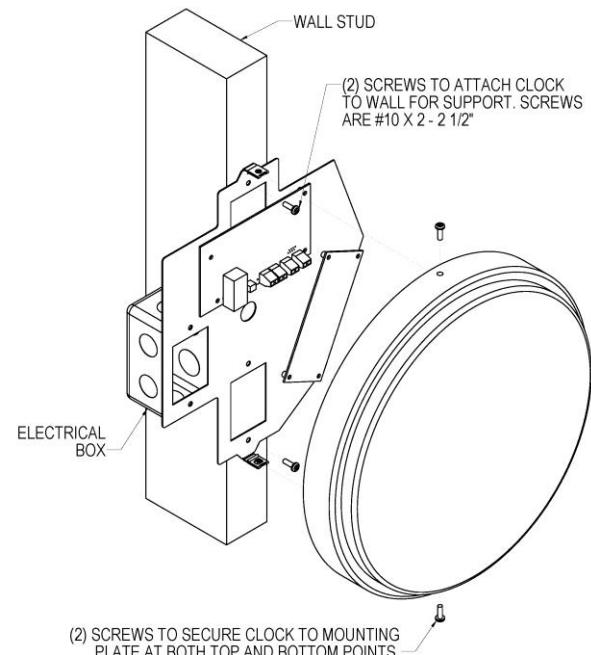

Figure 1. Mounting /Connections

Figure 2. Molex Connector

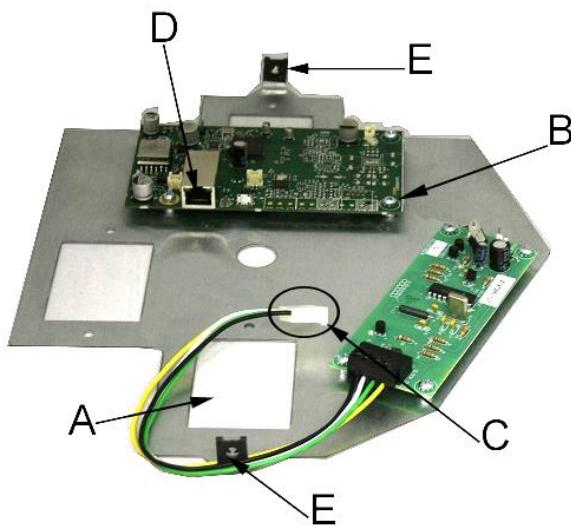

Figure 3. Mounting/Connections

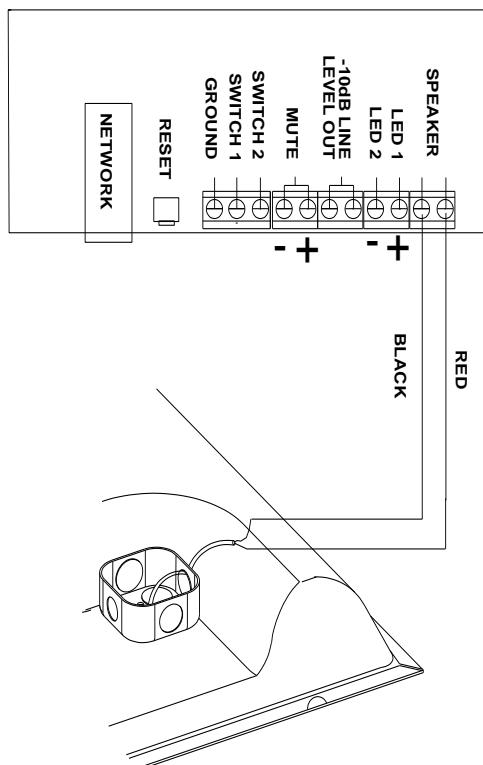

Figure 4. IP Clock/Speaker Connections

Network Connection

The VIP-4122-A12 has one RJ-45 network connector on the clock circuit board (D) in Figure 3. Connect a standard Ethernet patch cable from the VIP-4122-A12 into an Ethernet switch. If a PoE switch is not available, a PoE mid-span injector may be used to supply power to the clock and speaker.

Call Switch Connection

For IP Speakers using Talkback functionality, a call switch input via screw terminals is provided. Connect a momentary contact switch to Switch 1 and Ground.

-10 dB Line Level Out Connection

The -10dBm Line Level Out may be connected to up to 40 Valcom Self Amplified Speakers to provide additional sound reinforcement in an area.

LED 1 and LED 2 Connection

LED 1 (+) and LED 2 (-) is a current limited output designed to illuminate an optional LED. The LED is intended to provide visual indication of call progress. The LED illumination will flash when the call switch is pressed and will continue to flash until the call is answered. The LED illumination will be solid when a connection to the unit is established.

SETUP

The VIP-4122-A12 is programmed at the factory to acquire an IP address using Dynamic Host Configuration Protocol (DHCP). If DHCP is not available, it will revert to the IP address of 192.168.6.207 after 3 minutes.

In addition to the IP address, the clock will also try to acquire all the information needed to synchronize time from the DHCP Scope. If the DHCP Scope Options noted below are correctly configured, the clock will be able to acquire the correct time without further programming.

- Option 42, NTP Server IP Address.
- Option 100, POSIX Time Zone, example: "EST5EDT4,M3.2.0/02:00,M11.1.0/2:00". This is the preferred option and works for any area of the world.
- Option 101, Time Zone Name, example: "America/New_York". This option is only supported for North America time zones.

Each of these options from the DHCP scope can be overridden by manually programming the desired value using the Valcom VIP-102B IP Solutions Setup Tool. If not using DHCP for IP address assignment, all the Time settings will be configured using the Setup Tool.

Download the latest version of the free IP Solutions Setup Tool from the Valcom web site at www.valcom.com/vipsetuptool

TECHNICAL ASSISTANCE

When trouble is reported, verify power is being supplied to the unit and there are no broken connections. If a spare unit is available, substitute a spare unit for the suspected defective unit.

Assistance in troubleshooting is available from the factory. Call (540) 563-2000 and press 1 for Technical Support or visit our website at <http://www.valcom.com> or via email at support@valcom.com. Valcom equipment is not field-repairable. Valcom, Inc. maintains service facilities in Roanoke, VA. Should repairs be necessary, attach a tag to the unit clearly stating your company name, address, phone number,

contact person and the nature of the problem. Send the unit to:

Valcom, Inc.
Repair & Return Dept.
5614 Hollins Road
Roanoke, Va. 24019-5056

WARRANTY

Warranty information may be found on our website at www.valcom.com/warranty.
