

ISSUE 2

VIP-172AL IP DoorPhone/Intercom

INTRODUCTION

The VIP-172AL IP Talkback Doorphone/Intercom allows communication to Valcom FXS units (VIP-811, -812, -814) and SIP Based telephone systems via an IP-based network.

SPECIFICATIONS

Access Methods

- PBX, FXO Port w/VIP-811
- POTS telephone set w/VIP-811
- Valcom M Cast Page Group
- SIP enabled telephone system

Features

- RJ-45 for network connection
- 1 Form C relay
- Network activity LEDs
- Power over Ethernet (PoE) 802.3af
 compatible

Dimensions/Weight: VIP-172AL-VRSS

- 4.5" H x 4.5" W x 1.75" D (11.43cm H x 11.43cm W x 4.45cm D)
- Weight: 1.68 lbs. (0.76 kg)

VIP-172AL-Brass, VIP-172AL-ST

- 4.5" H x 4.5" W x 1.3" D (11.43cm H x 11.43cm W x 3.3cm D)
- Weight: 0.55 lbs. (0.25 kg)

Network Interface

- 1.62" H x 5.63" W x 3.45" D
 (4.11 cm) x (14.30 cm) x (8.73 cm)
- with brackets 8.22" W (20.87 cm)
- Weight: 2.10 lbs. (0.95 kg)

Network Interface

Class 3

Nominal Specifications

Input Impedance:	600 Ohms
Input Level:	-10dBm
Output Impedance:	600 Ohms
Output Level:	-10dBm nominal
Relay Current:	1 AMP @ 24VDC

Nominal Power Requirements Via 802.3af PoE Ethernet Switch:

Environment

Network Interface:

Temperature:0 to +40° CHumidity:0 to 85% non-precipitatingVIP-172AL Door plate:Suitable for indoor or outdoor installation

Packing List

Qty	Item
1	Network Interface
1	VIP-172AL Door Plate
1	VSP Document
4	Tamper Hardware (VRSS unit only)
4	Door Plate Screws (Brass/SS)
1	VIP172-RLY Relay Block

Precautionary Designations

FCC Information

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates uses and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area may cause harmful interference in which case the user will be required to correct the interference at his own expense.

INSTALLATION Operation:

The VIP-172AL provides door intercom access via network connection to customer telephone system or stand alone telephone set. Interface to customer telephone system can be via SIP registration to a voice over IP (VoIP) telephone system, or FXO port (when used with a VIP-811). Pressing the call button on the door plate initiates a call to a user-specified telephone number and the call assurance LED on the door plate begins to flash. When the call is answered, a hands-free communications path is established to the door plate, and the call assurance LED on the door plate remains lit. The form C relay included with the VIP-172AL may be activated by pressing the # key on the answering telephone, with the relay typically being used to activate door entry equipment.

Mounting

For enhanced protection against static electrical discharge, it is recommended the faceplate shipped with the VIP-172AL be installed into a grounded electrical box.

The VIP-172AL Doorplate is designed for double gang FD electrical box mounting and must be within 350 feet of the Network Interface. See NEMA OS 3-2002 sec.1.2.3.5 for FD box specifications.

The Network Interface is designed for wall mounting and must be within 100 meters of the network switch. Using the wood screws and mounting brackets provided, secure the Network Interface to the wall.

Power Connections

The only method of powering the Network Interface is via a Power over Ethernet (PoE) switch or power injector meeting the 802.3af specification.

Make all required signal connections before connecting to Ethernet switch or power injector meeting the 802.3af specification.

Network Connection

The Network Interface has one RJ-45 Network connector and one RJ-45 Signal Output connector on the front panel.

Use a standard Ethernet patch cable to connect the NETWORK connector of the Network Interface to an Ethernet switch.

Signal Connections

Connect RJ-45 using EIA/TIA 568B Standard to the signal connector of the Network Interface then to the RJ-45 connector of the VIP-172AL Door Plate.

Door Relay Connections

Access to the form C relay is provided via a three pin screw terminal block on the VIP-172AL Door Plate. The common contact is the middle terminal. The normally open contact is on the side closest to the RJ-45 connector, the normally closed contact is on the side furthest from the RJ-45 connector. For higher security, the included VIP172-RLY connection block can be used. Please refer to Figure 2 for wiring connections.

Status Indicator Lights

The VIP-172AL Door plate is equipped with a status indicator LED. LED flashes when the call button is pressed and steady when the call is connected.

The VIP-172AL has 2 status indication lights on the front panel:

Green LED: (Link) Indicates Ethernet connection when illuminated.

Yellow LED: (Activity) Indicator flashes to indicate network activity.

SETUP

Information specific to your application will need to be programmed into the VIP-172AL using a computer. The PC used for programming should be connected to the same subnet as the VIP-172AL. Setup will be done using the IP Solution Setup Tool. Download the latest version of the free IP Solutions Setup Tool from the Valcom web site at www.valcom.com/vipsetuptool

TECHNICAL ASSISTANCE

Assistance in troubleshooting is available from the factory. Call (540) 563-2000 and press 1 for Technical Support or via email at support@valcom.com.

When requesting assistance, you should include all available information. General information and troubleshooting procedures are available on the Valcom website at www.valcom.com.Valcom equipment is not field repairable. Valcom, Inc. maintains service facilities in Roanoke, VA.

Should repairs be necessary, attach a tag to the unit clearly stating your company name, address, phone number, contact person and the nature of the problem.

Send the unit to:

Valcom, Inc. Repair & Return Dept. 5614 Hollins Road Roanoke, Va. 24019-5056

WARRANTY

Warranty information may be found on our website at www.valcom.com/warranty.
