

GPS Master Clock

The Valcom GPS Master Clock receives accurate time updates via GPS satellites. It is available for either wired (V-GPSA) or wireless (V-GPS-TX) clocks allowing you to choose the best option for your facility. With the GPS Master Clock there is no need for a Network Time Protocol (NTP) source.

Features & Advantages

GPS Enabled

Ensures accuracy for wired & wireless clock systems.

System Compatibility

Integrates with Valcom analog & digital systems and many non-Valcom systems.
