

Noise Sensing Volume Controls

The noise throughout your organizations changes from minute-to-minute. Valcom's Noise Sensing Volume Control and Remote Microphone are able to sense changes in the noise level in an environment, and adjust the volume of the paging speakers in that area. The Noise Sensing Volume Control is ideal for manufacturing facilities, commercial printing companies and auto repair shops.

Valcom's family of volume control sensors include:

- Noise Sensing Volume Control (V-9934)
- Remote Microphone (V-9933A)

Features & Advantages

Constantly Monitors Ambient Noise Level in an Area and Adjusts Volume

Ensures that pages and announcements are heard when noise level in an area rises.

Phantom Powered

No power required.

Self-contained Microphone & Pre-amp

Measures your environments' sound level.

Analogue

Noise Sensing Volume Control.....V-9934A
