1-Tone Ringer Horn: V-9925A Loud Warble Ringer Horn

The V-9925A Loud Warble Ringer can be used for either interior or exterior signaling applications. The unit is designed to allow a loud warble to be broadcast as long as input signal is present. The input signal should be interrupted or controlled by the ringing interval.

Application

- Loud Speaker Tone Signaling for Key Systems, Intercoms, PABXs
- Outside Signaling for Incoming Calls into a Key System
- Signaling in a Noisy Environment

Features

- 5-Watt Amplifier
- Volume Control
- High-Efficiency Horn
- Tone Generation Circuitry

2-Tone Ringer Horn: V-9945A Single Tone/Interrupted Warble Tones

Provides amplified electronic tones for signaling in large or noisy areas or outside.

Application

- Night Ringing
- C. O. Audible Ringing
- Time Clocks
- Special Purpose Signaling

Features

- 5-Watt Amplifier
- Self-Contained Tone Generator, Amplifier, Volume Control and Horn Speaker
- Single Tone or Warble Tone Outputs
- Power Supply Included
- Activated by Dry Contact Closure
- Single Tone will Override Warble Tone
- Warble Tone Interrupted 1 Second On, 5 Seconds Off
- Single Tone Continuous for Duration of Closure
- Weather-Proof
- Units May be Multiplied for Simultaneous Access
